

IDYLLIC

Every twelve years, the hills of Munnar in Kerala burst into a sea of blue, a rare natural spectacle for which travelers make a beeline for. An endless stretch of rolling hills carpeted with tiny blue flowers called NEELAKURINJI welcomes the visitors.

HIGHER AND HIGHER BY-APOORVA SHARMA 11-A

WE LIVE IN A WONDERFUL
WORLD,
WHICH WAS ONCE ABSOLUTELY
SUPERB.
IT WAS FILLED WITH AMENITIES,
WHICH FULFILLED ALL OUR
NECESSITIES.

EVERY BEING WAS FILLED WITH
HUMANITY.
THERE WAS NO SCOPE FOR
IMMORALITY.
EVERYONE LIVED IN PEACE AND
CALM,
WITH EACH ONE HAVING A
UNIQUE CHARM.

BUT NOW EVERYTHING HAS
CHANGED,
WITH PEACE AND HARMONY
BEING COMPLETELY DRAINED.
OUR WORLD IS FILLED WITH
HATE.
WRITING ITS NEW FATE.

PEOPLE ARE KILLED EVERY DAY,
BY NEW DISASTROUS WAYS.
POWER IS WHAT EVERYONE
NEEDS.
BUT WE JUST NEED A STRONG
LEAD.

PEACE AND LOVE WE MUST GET,
AND THE MOST BEAUTIFUL
WORLD WE CAN SET.
A PEACEFUL LIFE IS WHAT WE
DESIRE
TO REACH HIGHER AND HIGHER.

*If you meet a person,
start talking about
global warming.
It's a real icebreaker.*

A LETTER FROM THE EARTH

BY- SANDHYA VISWANATHAN 9-C

MADE BY-SAISHA BHIRUD 8-D

Dear human,
It's been a while since we last spoke.
A lot has happened since.
From wildfires and a stock market crash to protests and explosions, heck even a pandemic.
The entire world is upside down and I just wanted to check in. In terms of me, I've never been better.
As cities and, in some cases, entire nations weather the pandemic under lockdown, and no humans to pollute my air with cars and smoke, I'm able to breathe without coughing every two seconds. The oceans spoke to me the other night, and oh how happy they were. They told me that the sea creatures are beyond excited to hear about the amount of waste decrease in their homes.
Of course, I'm not being insensitive to the grief and losses the humans are facing. It's a tough time and though the virus is still going strong, I know you will be able to make it. Your team has been working so hard to get rid of the terrible COVID-19 and I'm sure it will pay off.
Keeping all this aside, I have a small request for the humans.
As I said before, during these times of quarantine and lockdown, I have been feeling much better and my climate has lowered a little too!
But, I am afraid that after the pandemic gets over, you humans will start creating industries and cutting trees again. I am scared you will start polluting the oceans and the air and stop caring about me. When life goes back to normal for you all, I will go back to not feeling loved anymore.
So, I want you all to understand that your activities are hurting your own species in the long run. Cutting my trees and clearing my land not only hurts me, but will destroy the place you live in. Do you know how much work I put to help you all each day? And what I get back in return is careless urbanization, inexhaustible CO2 emissions, river channelization, unchecked extraction of fossil fuels and many more.
I hope the pandemic has made you realize the effects of your careless activities on me. If you want me to take care of you, you need to take care of me first.
Yours,
Earth

PRIMARY WING

IT'S TIME FOR NATURE

BY-JAIVARDHAN NAWANI

Stop and think,
"Are we at the brink
of making life on earth extinct?"

That's exactly right
and we will have
to pay a price
that will fill the
world with disaster
in a trice.

Everyone has equal rights.
So does Mom Nature, she is so nice.
Plus, in an era like this,
even one move shall suffice,
to make wrong things right.

Oh, yeah! The time is ripe.
So, let us make wrong things right!

HEGDE 5-A

WHAT DID THE
LITTLE TREE
SAY TO THE BIG
TREE?

LEAF ME
ALONE!!

WHAT??

...BYE

ENVIRONMENT AND ME

BY-JAIVARDHAN NAWANI

The Environment and humanity both go hand in hand together. But for the past one hundred years, this is not true anymore.

Why so?

Because we have become addicts to factories, technology, and modernization. Nowadays we have totally forgotten that there is no Planet B and we are considering that technology is the new way to be and stay alive.

Wrong.

Without nature, humans are out of existence.

The reason we sit here alive is not because of anything but nature, because it

will not turn its back on us. The Ozone layer keeps us safe; plants and animals keep us alive, plants emit oxygen, the only gas we can breathe. Hardly anything can be done without nature. It is time to go back to what we

were, simple people who would not hurt the earth. It is not necessary to go

back to being cavemen but to treat the earth as a mother and take care of her like she takes care of us. We do not have any other planet to live on.

And

even if we did, it would not be as good.

Do you want to know the brutal end we might come to if we do not take care

of the earth?

The Ozone layer will break apart, Ultraviolet Rays will beam down, and eventually, the earth will be barren.

It is time for nature.

And let us take care of it before it is too late.

@dpsecocommittee

@dpsecocommittee

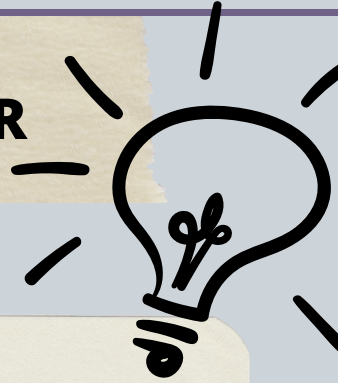

- According to NASA, the world's rainforests will be gone by 2100 if the current rate of destruction continues.
- When you throw plastic bags and other plastic materials in the ocean, it kills as many as 1 million sea creatures annually.
- Our planet gains inhabitants numbering 77 million people a year.
